Presenter Information

Lori Chambers M.S., CCC-SLP Regional Systems Coordinator TASN Autism and Tertiary Behavior Supports

Tri State Webinar Series 2015-2016

Presentation Summary

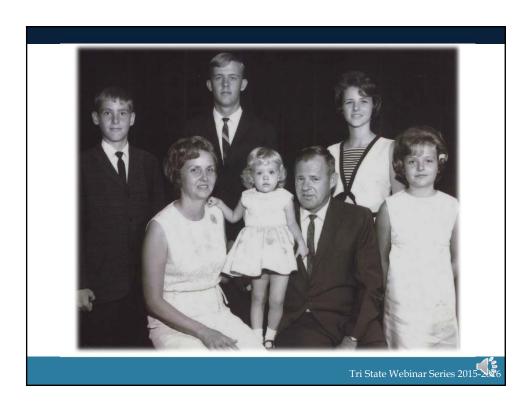

This webinar is the second in a series of four for early childhood educators. Today we will focus on preparing ourselves for purposeful play. We will begin to explore the important role adults can take in helping children with developmental delays learn to interact, communicate and play. You will be introduced to strategies that facilitate interaction during those times when playing, communicating and socializing is the goal.

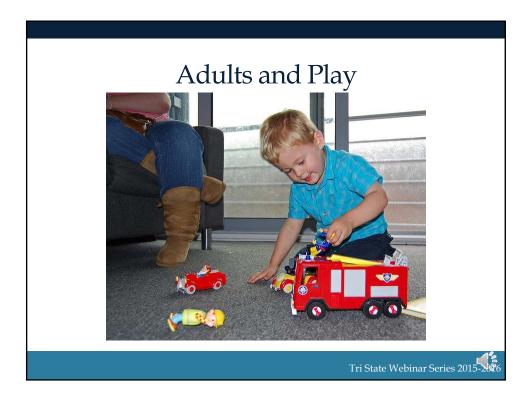

Learner Objectives

Participants will:

- Identify levels of play for a student with autism
- Recognize characteristics in adult/child interaction that affect the development of children's play.
- Identify tips for facilitating purposeful play.

Types of Cognitive Play

- Exploratory play
- Cause and Effect
- Toy play
- Constructive Play
- Physical Play
- Pretend Play

Beyer and Gammeltoft 1999

What would be an example of constructive play?

- A. spinning the wheels of a toy car
- B. stacking a tower of cans
- C. running up and down the playground
- D. flipping the eye lids of a baby doll open and closed

Tri State Webinar Series 2015-2016

Autism and Play

Social Play (People Play)

- Solitary play
- Parallel play
- Associative play
- Cooperative play

Sheridan 1999

Tri State Webinar Series 2015-

The Difficulty with Social Play

There are three distinct behaviors that characterize children with autism:

- Difficulties with verbal and nonverbal communication.
- Difficulties with social interaction.
- Repetitive behaviors or narrow, obsessive interests.

-Griffin and Sandler 2010

We join in play because some children will not learn the life changing nuances of social interaction and infinite possibilities of play unless we join them.

The ability to share an understanding of the social world with others requires:

- Awareness of others
- Understanding of how to effectively engage others in play
- Understanding the feelings of others and how they are likely to respond

Engaging in social play provides modeling and practice for learning to share

Adapted from Seach 2007

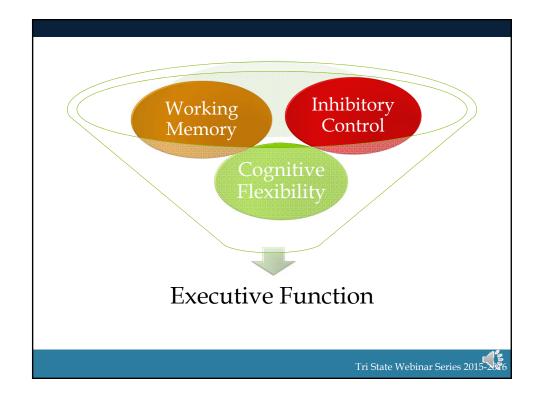

the social world.

Children build their (executive function) skills through engagement in meaningful social interactions and enjoyable activities that draw on self-regulatory skills at increasingly demanding levels

<u>levels.</u>

Enhancing and Practicing Executive Function Skills with Children from Infancy to Adolescence, Center on Developing Child- Harvard Univ.

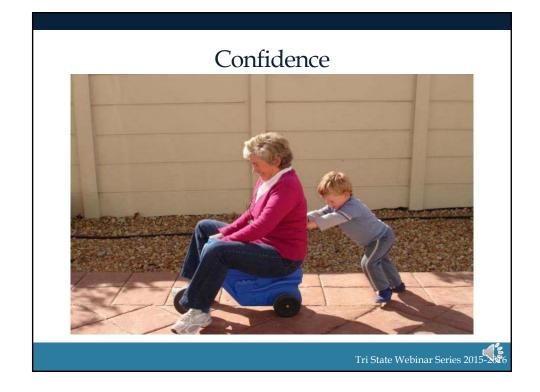

For many children including those with autism, it is not enough to simply provide the opportunity, materials, peer models and environment for play. We also need to join in play to teach foundational skills for interaction.

True

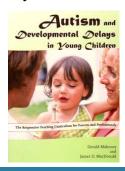

False

The impact parents have on children's development is related more to how they respond to their children than to what they do when they play.

Gerald Mahoney & James D. MacDonald

Target social play if the child:

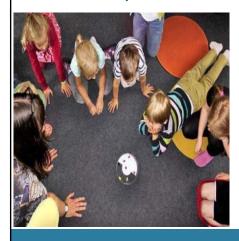

- Does not have frequent episodes of one-to-one play with parents and other caregivers
- Does not stay engaged long in play and other interactive episodes with parents and caregivers
- Engages in play routine with parents and others that are more task oriented than playful and fun.

Gerald Mahoney & James D. MacDonald

Insert Adult Here

- Purposeful adult interaction should have a goal in mind without being task oriented.
- Flexible the flow of the play should be flexible enough to follows the child's direction of interest.
- Time for practice- be aware of times already built into the day when play can be practiced in a naturalistic setting.

• Based on the video, what is the student's cognitive play level and social play level?

Play Like a Child

about myself:

Play in the same activity Play as the chil does Play as much or mo than I talk Be more interesting that the child's distractions

- Have fun
- Play in the same activity
- Play as the child does
- Play as much or more than I talk
- Be more interesting than the child's distractions

Which of these characteristics of playing like a child did you see in Allie's play with this student?

- Have fun
- Play in the same activity
- Play as the child does
- Play as much or more than you talk
- Be more interesting than the child's distractions

Poll 4

Which of these characteristics of playing like a child did you see in Allie's play with this student?

- Have fun
- Play in the same activity
- Play as the child does
- Play as much or more than you talk
- Be more interesting than the child's distractions

Get Into the Child's World

- Get on the same physical level as the child
- Communicate on the same level as the child
- Consider the world from the child's point of view

Use Mirroring and Parallel Play to Join an Activity

- Play side by side with similar toys
- Act the way he acts- Follow his lead

Tri State Webinar Series 2015-206

Take One Turn and Wait

- Take your turn with a word or action
- Wait....Wait....Wait....Wait....
- Use your eyes, face and body to show you are anticipating their turn

Imitate the Child's Actions and Communications

- Imitate any actions, sounds and words
- Imitate the child so that they learn to imitate you
- Imitation establishes an interactive relationship
- Imitation teaches the child that he can have some control

Tri State Webinar Series 2015-206

Poll 5

• What strategies do you see Sharon using in this video?

"Play is the work of the child" - Maria Montessori

"Play is the work of an early childhood provider who knows the joy that comes from remembering how to be a child"

-me when it wasn't too cold at recess that day

Up Next!

- Part 3 Teaching Object Based Play Presented by Teri McGill, M.S. Ed.
- Part 4 Incorporating Play into the Natural Environment Presented by Lindy McDaniel, M.S. Ed.
